TEXAS EDUCATION AGENCY
FALL 1989-90 PERSONNEL ROSTER
SEX AND ETHNICITY REPORTS

INTRODUCTION

These reports present Fall 1989-90 PEIMS data for school district staff summarized by personnel type, sex and ethnicity. Three levels of summarization are provided: district within county (includes county totals); analyze categories; and state totals. All public school districts are included, with the following exceptions: state schools, Texas School for the Blind, Texas School for the Deaf, Windham Schools, and West Texas Childrens Home.

PERSONNEL TYPE

Teachers -- classroom instructors classified as pre-kindergarten and kindergarten, elementary, secondary, special education, all level and unknown. All level refers to subjects which are not limited to one grade level; for example, discipline management, home room, or tutorials. Unknown means the course code does not identify the grade level; for example, co-curricular activities or locally developed courses.

Support Staff -- professional staff classified as supervisors, counselors, educational diagnosticians, librarians, nurses or physicians, therapists, psychologists or associate psychologists, and other support staff.

Administrators -- professional staff classified as administrative or instructional officers, campus principals or assistant principals, and district superintendents or assistant superintendents.

Professionals -- the total of teachers, support staff, and administrators.

Educational Aides -- personnel involved in instructional support and generally considered to be non-professional.

Auxiliary -- other school district staff, such as cafeteria workers, janitors, secretaries, bus drivers.

The classification of personnel into types is based upon role, service and population-served codes, as reported to Texas Education Agency by districts through PEIMS. However, auxiliary staff responsibilities are not reported to TEA. Therefore, auxiliary staff are classified by the absence of any responsibility data.

FULL-TIME EQUIVALENT

Personnel are counted as full-time equivalents (FTE's). The total FTE for each employee measures the extent to which the person is working full-time. This calculation is based upon the actual number of days employed, the percent of day employed and the number of contract days (as determined by personnel type). For example, a teacher working a half day for the entire school year would be counted as one-half of a full-time equivalent (.5 FTE).

Employees with varied responsibilities may be counted in more than one personnel type. A person working a partial day as a counselor and the rest of the day as a teacher would be counted as a fraction of an FTE in each group.

Calculations for an individual's FTE are accurate to four decimal places. The counts printed on the attached reports are rounded; therefore, totals may not exactly agree with the sum of printed detail.

SEX AND ETHNICITY TOTALS

All staff are reported with codes identifying sex and ethnic classification. Within each personnel type, summaries of total males, total females, and total of both sexes are provided. Also, the male and female counts are further subdivided into five ethnic groups, defined as follows:

White -- Caucasian, not of Hispanic origin, having origins in any of the original peoples of Europe, North Africa, the Middle East or Indian subcontinent.

Hispanic -- a person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

Black (not of Hispanic origin) -- a person having origins in any of the black racial groups.

Asian (or Pacific Islander) -- a person having origins in any of the original peoples of the Far East, Southeast Asia, or the Pacific Islands.

American Indian (or Alaskan native) -- a person having origins in any of the original peoples of North America.

TEXAS EDUCATION AGENCY
FALL 1989-90 PERSONNEL ROSTER
SALARY REPORTS

INTRODUCTION

These reports present Fall 1989-90 PEIMS data for school district staff summarized by personnel type and payroll activity. Three levels of summarization are provided: district within county (includes county totals); analyze categories; and state totals. All public school districts are included, with the following exceptions: state schools, Texas School for the Blind, Texas School for the Deaf, Windham Schools, and West Texas Childrens Home.

PERSONNEL TYPE

Teachers -- classroom instructors classified as pre-kindergarten and kindergarten, elementary, secondary, special education, all level and unknown. All level refers to subjects which are not limited to one grade level; for example, discipline management, home room, or tutorials. Unknown means the course code does not identify the grade level; for example, co-curricular activities or locally developed courses.

Support Staff -- professional staff classified as supervisors, counselors, educational diagnosticians, librarians, nurses or physicians, therapists, psychologists or associate psychologists, and other support staff.

Administrators -- professional staff classified as administrative or instructional officers, campus principals or assistant principals, and district superintendents or assistant superintendents.

Professionals -- the total of teachers, support staff, and administrators.

Educational Aides -- personnel involved in instructional support and generally considered to be non-professional.

Auxiliary -- other school district staff, such as cafeteria workers, janitors, secretaries, bus drivers.

The classification of personnel into types is based upon role, service and population-served codes, as reported to Texas Education Agency by districts through PEIMS. However, auxiliary staff responsibilities are not reported to TEA. Therefore, auxiliary staff are classified by the absence of any responsibility data.

FULL-TIME EQUIVALENT

Personnel are counted as full-time equivalents (FTE's). The total FTE for each employee measures the extent to which the person is working full-time. This calculation is based upon the number of days employed, the percent of day employed and the number of contract days (as determined by personnel type). For example, a teacher working a half day for the entire school year would be counted as one-half of a full-time equivalent (.5 FTE).

Employees with varied responsibilities may be counted in more than one personnel type. A person working a partial day as a counselor and the rest of the day as a teacher would be counted as a fraction of an FTE in each group.

Calculations for an individual's FTE are accurate to four decimal places. The counts printed on the attached reports are rounded; therefore, totals may not exactly agree with the sum of printed detail.

PAYROLL ACTIVITIES

All staff payroll amounts are reported through PEIMS with a code identifying them as base pay or supplements for additional duties. Within each personnel type, the total base pay and average base pay are provided. Supplements for non-teaching duties and career ladder supplements are not included in the amounts. For each personnel type:

Avg Base Salaries = Base Salaries divided by FTE Count.
